### Lambda School

Full Stack Web Development

## About

Software Engineer with experience building full-stack web applications. Prior experience as a designer and policy writer working with cross-functional teams to solve complex problems.

## Work History

### Topia.io

#### Software Engineer

Mar 2021– Oct 2021

- Created the platform's public API to help customers integrate the product into their own company workflows.
- Added image compression workflows to all user generated content.
- Created new backend services to replace legacy infrastructure.

### Arthur AI

#### Software Engineer

Mar 2021– Oct 2021

- Rebuilt the platform's frontend dashboards and migrated the application's frontend stack.
- Built full-stack state sharing system using Go backend services and React.
- Wrote and deployed Python serverless functions to offset particular workflows from our main backend services.

### MakerOS

#### Software Engineer

Feb 2020– Mar 2021

- Migrated the platform's front-end to a server-side rendered Vue.js application taking advantage of Laravel's data layer while using a modern front-end framework.
- Developed a CSS theme builder system allowing customers to compile custom scss themes and providing an up-sell opportunity for the sales team.
- Created REST API endpoints to be consumed by single-page components.

### Amino Apps

#### Trust & Safety Policy Specialist

May 2019 – Jan 2020

- Cleaned and compiled training data to be used in several risk detection Machine Learning models.
- Collaborated with developers to build internal tools.
- Drafted policies for the Trust & Safety team to follow.
- Researched laws and industry policy standards.
- Developed policy training material.
- Conducted QA across the team and used feedback to improve existing policies and workflows.

#### Trust & Safety Associate

May 2018 – Apr 2019

- Moderated user generated content to protect the integrity of the platform.
- Approved featured content to ensure it followed internal policies and brand guidelines.
- Collaborated with the team to polish workflows and policies

### Dearest Inc.

#### Web Designer

Oct 2016 – Feb 2018

- Worked closely with developers and the CEO to translate business goals into technical feature specs.
- Planned and designed UX/UI Front-End workflows.
- Made front-end changes to the React.js application.
- Created custom HTML layouts for the company's Squarespace marketing site.
